Query 1 students SQL File 4* x

Limit to 1000 rows

```
1 • select * from school.students;  
2 • insert into school.users (name, lastname, password) values ("Frederik", "Olsen", "1234");  
3
```

Automatic code disabled. Use manually get current caret toggle auto

Context Help Snippet

Output

Action Output

#	Time	Action	Message	
1	13:08:50	select * from school.students LIMIT 0, 1000	7 row(s) returned	0.
2	13:09:53	insert into school.users (name, lastname, password) values ("Frederik", "Ols...	Error Code: 1142. INSERT command denied to user 'user2'@'195.249.146....	0.

But can view students

The screenshot shows a database management tool interface. At the top, there is a toolbar with various icons and a "Limit to 1000 rows" dropdown. Below the toolbar, there is a SQL editor with two queries:

```
1 • select * from school.students;  
2 • insert into school.users (name, lastname, password) values ("Frederik", "Olsen", "1234");  
3
```

Below the SQL editor, there is a "Result Grid" section. It includes a "Filter Rows:" input field and a table of results. The table has columns: id, name, and lastname. The data is as follows:

id	name	lastname
14	Rasmus	Rasmussen
15	Kristian	Kristensen
16	Amalie	Arnsesen
17	Sofie	Olsen
19	id student	test
20	id student	test
21	Rasmus	Rasmussen
*	NULL	NULL

On the right side of the interface, there is a vertical toolbar with icons for "Result Grid", "Form Editor", and "Field Types". Below the SQL editor, there is a tab labeled "students 2" with "Apply" and "Revert" buttons. At the bottom, there is an "Output" section with a dropdown menu set to "Action Output". It displays a log of actions:

#	Time	Action	Message
✓ 1	13:08:50	select * from school.students LIMIT 0, 1000	7 row(s) returned
✗ 2	13:09:53	insert into school.users (name, lastname, password) values ("Frederik", "Ols...	Error Code: 1142. INSERT command denied to user 'user
✓ 3	13:11:09	select * from school.students LIMIT 0, 1000	7 row(s) returned

User3 can't see anything

The screenshot shows a SQL IDE interface. The main editor window, titled 'Query 1', contains the SQL statement: `select * from school.students;`. The 'Output' pane at the bottom displays the 'Action Output' table, which shows a failed execution of the query. The error message is: 'Error Code: 1142. SELECT command denied to user 'user3'@'195.249.146.1...'. A sidebar on the right contains a message: 'Automatic con disabled. Use ti manually get l current caret p toggle auton'.

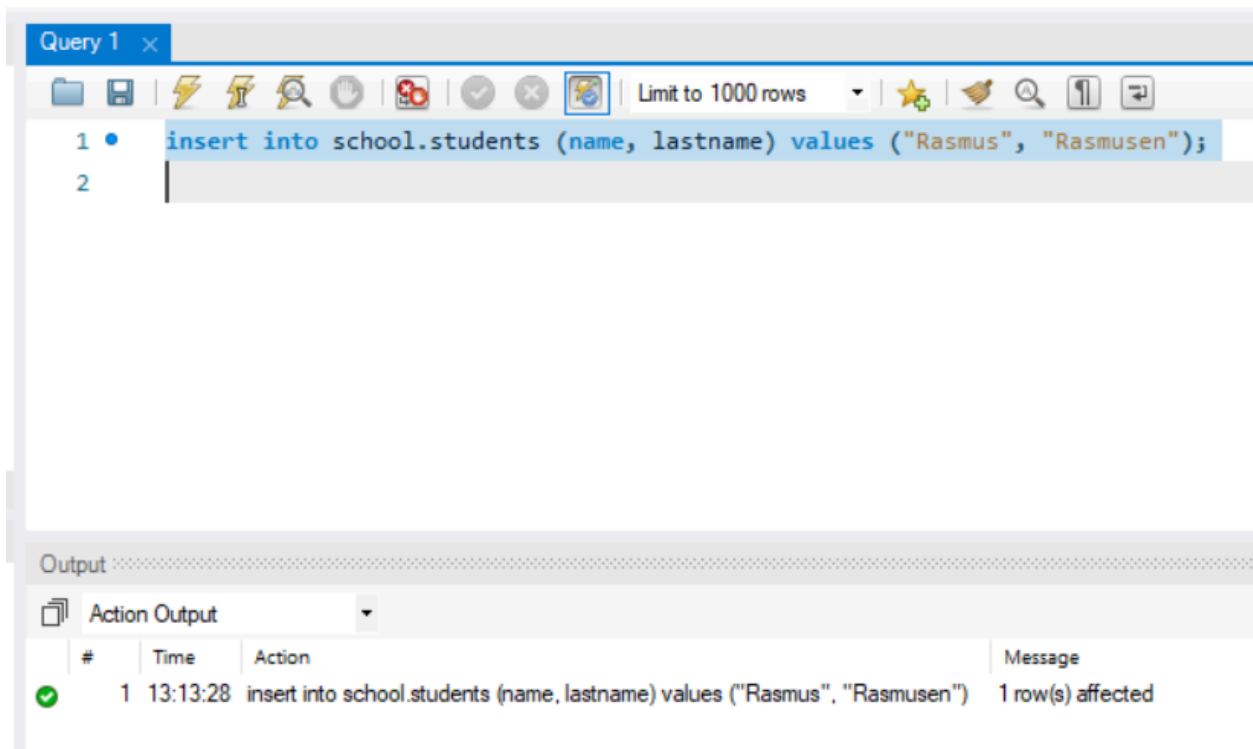

#	Time	Action	Message
1	13:19:26	select * from school.students LIMIT 0, 1000	Error Code: 1142. SELECT command denied to user 'user3'@'195.249.146.1... 0

Or delete from the database

The screenshot shows the same SQL IDE interface. The main editor window now contains two SQL statements: `select * from school.students;` and `delete from school.students where lastname = "Rasmusen";`. The 'Output' pane shows two failed execution attempts. The first error is the same as in the previous screenshot. The second error is: 'Error Code: 1142. DELETE command denied to user 'user3'@'195.249.146.... 0'. The sidebar on the right contains the same message: 'Automatic con disabled. Use ti manually get l current caret p toggle auton'.

#	Time	Action	Message
1	13:19:26	select * from school.students LIMIT 0, 1000	Error Code: 1142. SELECT command denied to user 'user3'@'195.249.146.1... 0
2	13:20:30	delete from school.students where lastname = "Rasmusen"	Error Code: 1142. DELETE command denied to user 'user3'@'195.249.146.... 0

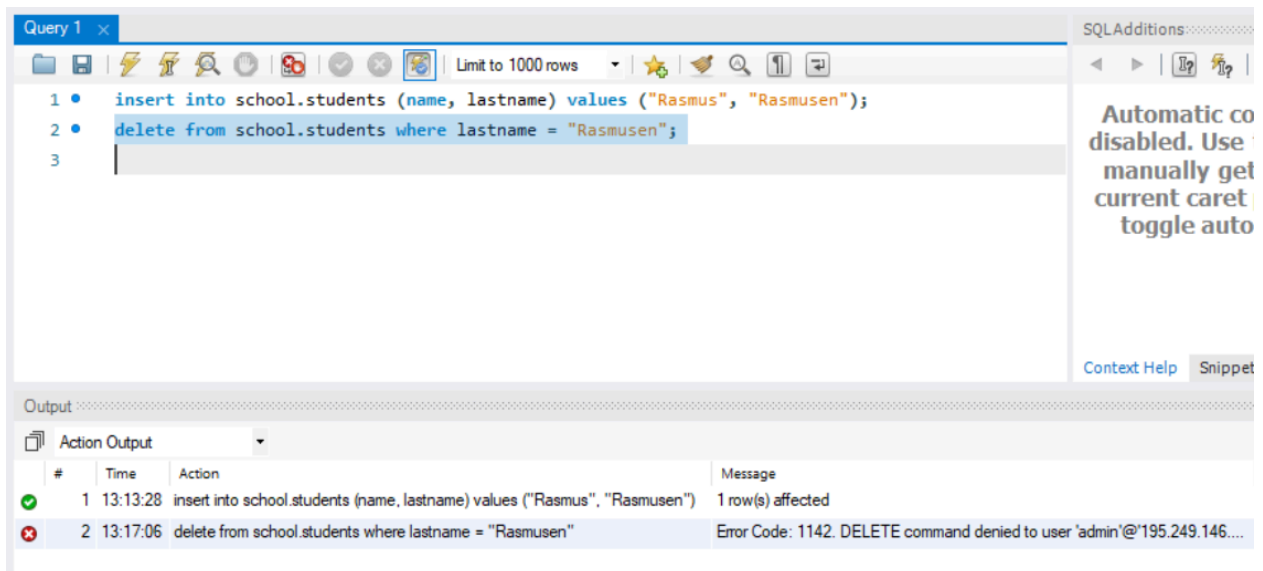

Admin can write into the database

The screenshot shows a SQL query editor window titled "Query 1". The query text is: `insert into school.students (name, lastname) values ("Rasmus", "Rasmusen");`. The editor has a toolbar with various icons and a "Limit to 1000 rows" dropdown. Below the query editor is an "Output" section with a dropdown menu set to "Action Output". The output table has columns: #, Time, Action, and Message. It shows a single successful action: a green checkmark, #1, time 13:13:28, the insert statement, and the message "1 row(s) affected".

#	Time	Action	Message
✓ 1	13:13:28	insert into school.students (name, lastname) values ("Rasmus", "Rasmusen")	1 row(s) affected

But not delete a student

The screenshot shows the same SQL query editor window with two queries. Query 1 is the insert statement, and Query 2 is the delete statement: `delete from school.students where lastname = "Rasmusen";`. The "Output" section shows the results of both queries. The first query was successful, but the second query failed with an error. A message box on the right says "Automatic code completion is disabled. Use manually get current caret position to toggle auto completion." The output table shows the error details for the second query.

#	Time	Action	Message
✓ 1	13:13:28	insert into school.students (name, lastname) values ("Rasmus", "Rasmusen")	1 row(s) affected
✗ 2	13:17:06	delete from school.students where lastname = "Rasmusen"	Error Code: 1142. DELETE command denied to user 'admin'@'195.249.146....
